Task 2 – Data Visualization & Storytelling

Superstore Sales Analysis | Power BI / Tableau-ready dataset

Total Sales: $154,820
Total Profit: $23,464
Profit Margin: 15.2%
Total Quantity: 1,295
Orders: 240

Key takeaway: East is the highest-sales region, while Technology is the strongest sales category.

Story: Overall performance → trend → regional/category comparison → business actions

Insight: Furniture has the lowest total profit and deserves margin/pricing review.

Executive Storyboard

1. Start with KPI cards: Sales, Profit, Profit Margin, Quantity and Orders.

2. Show monthly sales trend to explain when performance changes.

3. Compare regions: East is the leading sales region.

4. Compare categories: Technology leads sales; check whether profit follows the same pattern.

5. Action: investigate the lowest-profit category (Furniture) for pricing, discounting or cost issues.

6. Add filters for Region, Category, Segment and Date so users can explore the story.
